

SETTOP ADL-TDL BATTERY

LITHIUM ION
RECHARGEABLE
BATTERY
11.1V / 10.4AH

CARBON
FIBRE

CHARACTERISTICS

- Integrated into the radio
- Without cables
- Lightweight design
- High performance
- Simplifies the field work operation

The Settop ADL Battery is an accessory for ADL radios and makes it possible to power the radio for base corrections or repeater purposes. No need to use complicated external cables and car batteries to power your radio. The high capacity of the Settop ADL battery allows you to work with the radio for a long time. The Settop ADL battery has been designed for outdoor use; and the best quality components and carbon fiber have been applied.

TECHNICAL SPECIFICATIONS

Nominal voltage: 11.1V
Nominal capacity: 10.4Ah
Maximum output current: 18Ah

Short-circuit protection.
Operation temperature:
Charge 0-45°C
Discharge -20-60°C

Connectors:
1 X male Lemo 5 pins
1X female Lemo 5 pins
Communication connections from connector A to B

Dimensions:
97 x 78 x 135 mm
Weight: 750 g.
Water and dust protection: IP67

Battery: 20 h (4W)
Calculated transmission
CMR+ to 1 second.
