

# SETTOP octoHub

MAXIMIZE THE POTENTIAL OF YOUR  
SETTOP M1 WITH THE NEW SETTOP  
OCTOHUB PORT MULTIPLIER

**NEW  
MODULE  
FOR  
SETTOP M1**

## CHARACTERISTICS

- USB Host (x2)
- RS232 (x3)
- Ethernet (x1)
- Thermometer (x1)
- Total Station (x1)
- Settop M1 (x1)
- Power (x1)

**USB1/USB2**  
Connect any type of device/  
sensor via a USB Host  
connection

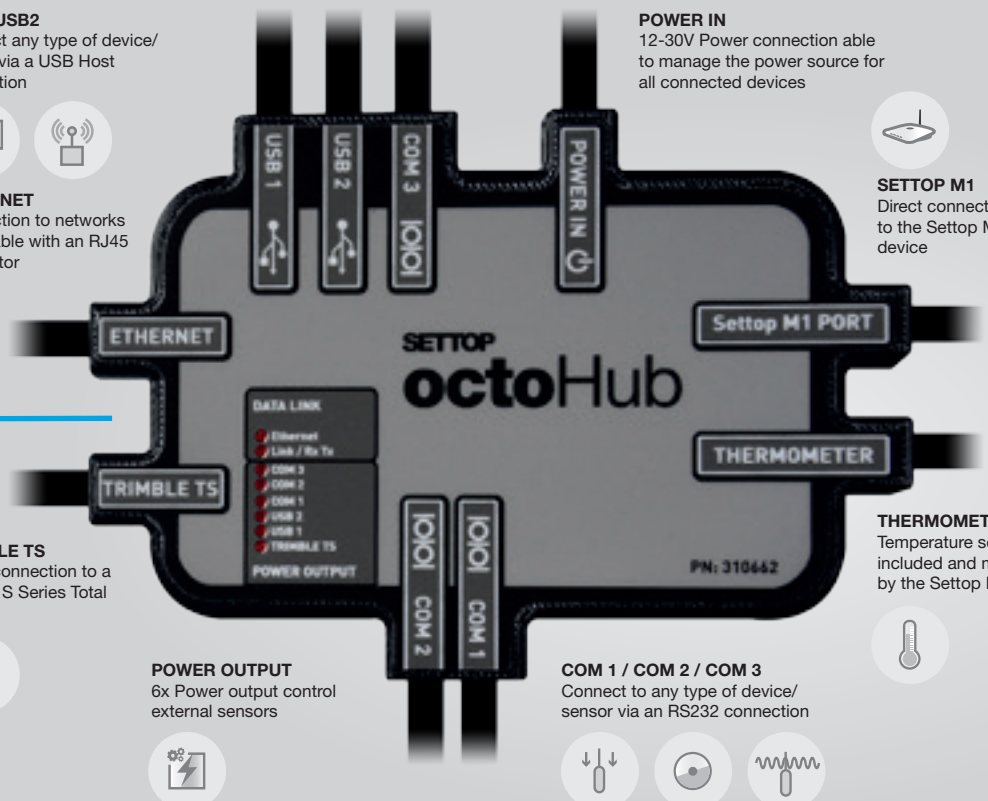

**ETHERNET**  
Connection to networks  
via a cable with an RJ45  
connector

**POWER IN**  
12-30V Power connection able  
to manage the power source for  
all connected devices

**SETTOP M1**  
Direct connection  
to the Settop M1  
device

**TRIMBLE TS**  
Direct connection to a  
Trimble S Series Total  
Station

**POWER OUTPUT**  
6x Power output control  
external sensors

**COM 1 / COM 2 / COM 3**  
Connect to any type of device/  
sensor via an RS232 connection

**THERMOMETER**  
Temperature sensor  
included and managed  
by the Settop M1

## PORT MULTIPLIER ACCESSORY

The new Settop Octohub opens up a wide range of possibilities for the user to connect to numerous diverse sensors and devices via their Settop M1. With all of the multiple communication ports integrated in just one single device, you can forget about complex cable counts in scenarios of reduced space and you can also stop worrying about losing data from a specific sensor which needs to be analyzed as you will have all of the data that you need within easy reach for a quick and easy analysis for all types of surveying work.

## ADVANTAGES

- Multiplies by 5 the possibility of connecting sensors
- Temperature sensor included
- Compact device
- Connection with just one single cable
- Cable organizer
- Control of power for connected total stations and sensors
- LED indicators of devices connected
